United Diagnostic Services will be conducting Early Detection Diagnostic Testing, which has proven successful in identifying actionable pathologies to improve overall health as well as early detection for cancer and cardiovascular issues. Early detection has had a significant impact on helping prevent and reverse potential future catastrophic events. All tests are ultrasound-based and therefore painless.

All tests are ultrasound based and therefore painless, and non-invasive. Tests include an Echocardiogram, Carotid, Abdominal Aorta, Thyroid, Liver, Spleen, Bladder, Kidney, and Testicular. This screen also includes an Exterior Pelvic scan for females. The examination will take approximately 30 min to complete.
